

VentSure® Rigid Roll Ridge Vents

With Weather PROtector® Moisture Barrier

VentSure® Rigid Roll Ridge Vents are shingle-over, low-profile ridge vents designed for effective performance of ventilation for an energy efficient roofing system and provide year-round protection and consistent ventilation in the attic, while achieving a natural, finished look for your roof. What's more, *VentSure* Rigid Roll Ridge Vents have a Weather PROtector® moisture barrier that helps provide added protection against weather infiltration.

VentSure® Rigid Roll Ridge Vents.

For an efficient roofing system, it's essential that the attic stay dry and cool. You can create this environment by using *VentSure* Rigid Roll Ridge Vents in combination with undereave soffit vents to allow the natural flow of outside air upward into the attic—and back out again. Without this system, moisture can reduce the effectiveness of your insulation, causing rotting or mildew on wood surfaces, drywall damage, peeling paint or warped siding. *VentSure* Rigid Roll is an essential component for a complete and healthy roofing system.

- Patented, durable corrugated plastic construction
- Low $\frac{5}{8}$ " profile for attractive ridge line
- Long-lasting 50-Year Limited Warranty*
- Regional availability in three different widths: 11 $\frac{1}{4}$ ", 9" and 7" (see map for details)
- Unique design adjusts to almost any roof pitch (2/12 to 20/12)
- Easy-to-handle 20' rolls; end caps are provided in each roll
- Net free vent area: 12.5 sq. in. per lineal ft.
- Meet or exceed requirements of recognized national building codes for ventilation when properly installed with soffit or eave vents
- Passed the following research and development tests for weather infiltration:
 - Testing performed at Architectural Testing Incorporated (ATI) in York, PA
 - Wind-driven rain—8.8" of rain at 110 MPH—PASSED
 - Snow infiltration—snow simulation at 35 and 70 MPH—PASSED with no infiltration
 - Meet ICC ES ESR 2664
- Recycled Content 30% pre-consumer
- Contributes to meeting criteria for high performing buildings, including LEED

* See actual warranty for complete details, limitations and requirements.

The essentials for a healthy roofing system.

It takes more than just shingles to create a high-performance roof. It requires a system of products working together. The Owens Corning™ Roofing System is a lineup of key products that can help provide maximum durability for the roof. And the most protection for the home.
